Education

- **Indian Institute of Technology, Palakkad** — Palakkad, Kerala
  *BTech in **Civil Engineering**; CGPA: **8.54*** — ***Aug 2023 - July 2027(Tentative)***
- **Guru Tegh Bahadur Public School** — Model Town, New Delhi
  *Central Board of Secondary Education; **XII** Percentage: **95.8*** — ***2022***

Experience

- **Accenture** — Gurugram, India
  Advanced Application Engineering Intern — *May 2026 – Jul 2026*
  - Configured and provisioned client tenants on **Okta Customer Identity Cloud (CIC)**, supporting **identity & access management (IAM)** for enterprise environments.
  - Built **AI/LLM-driven automation scripts** to streamline tenant configuration workflows, reducing manual operational effort.
- **IIT Palakkad** — Palakkad, Kerala
  Administrative Intern — *Jan 2026 – May 2026*
  - Developing a production-grade Campus Security & Gate Pass Management System using **Next.js, TypeScript, Supabase, Tailwind CSS**.
  - Designed **role-based access control** and backend workflows to digitize campus security operations.

Projects

- **AutoJudge**: **- Next.js, React, FastAPI, Supabase, Docker, Kubernetes (Minikube)** — **Source code**
  - Architected a **cloud-native coding evaluation platform** with a **Next.js/React** frontend (SSR) and **FastAPI** backend integrated with **Supabase (PostgreSQL + Auth)** for secure authentication and persistent storage.
  - Designed **Dockerized, isolated execution environments** to safely run untrusted student code, orchestrated via **Kubernetes Jobs (Minikube)** for scalable, fault-tolerant concurrent submissions.
  - Automated compilation, execution, and grading pipelines via test cases, **eliminating manual TA evaluation** for large-scale lab assessments.
- **Financial Sentiment Forecasting using Entity-Aware Transformers**: **- Python, PyTorch, Transformers, XGBoost, LightGBM, Scikit-Learn** — **Source code**
  - Curated and preprocessed a **25K+ entity-level financial news dataset**, structuring it for entity-aware sentiment extraction and temporal return forecasting across 1/2/5-day horizons.
  - Contributed to the **end-to-end ML pipeline** architecture, supporting feature integration between the sentiment-extraction stage and downstream forecasting models.
  - Supported **benchmarking** across multiple models (Ridge, XGBoost, LightGBM, PyTorch MLP), assisting with evaluation and comparison of forecasting performance.

Achievements

- **Inter IIT Tech Meet 14.0:** Led institute contingent securing **1 Gold, 1 Bronze, and multiple top ranks**.
- Achieved a **Global Rank 3471** in **LeetCode Biweekly 150** among **30,000+** active participants worldwide.
- Solved **350+** problems on **LeetCode** and **Codeforces**.

Skills

- **Languages:** C++, Python, Java, TypeScript.
- **Databases:** SQL, PostgreSQL, MySQL.
- **Frameworks & Tools:** Next.js, React, FastAPI, Supabase, Docker, Kubernetes.
- **Security & Identity:** Okta CIC, IAM, OAuth.
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, System Design Basics.

Positions of Responsibility

- **Contingent Leader, IIT Palakkad** — Inter IIT Tech Meet 14.0
  Led end-to-end coordination and technical strategy for the institute's participation. — ***Sep 2025 – Jan 2026***
  - Designed and implemented structured workflows for problem statement allocation, progress tracking, and mid-prep submissions, achieving **100% on-time compliance**.
  - Represented the institute in board and coordination meetings, resolving rule ambiguities and aligning team deliverables with evaluation criteria, contributing to **podium finishes and multiple top rankings**.
